Cooking The Way You Want.

BASE HEAT	TOP HEAT	CONVENTIONAL HEAT	FAN HEAT	FAN HEAT WITH BASE HEAT
Bottom element only Removes the need to blind bake	Top element only Gentle heat to brown the top of a dish	Top and bottom elements Cooking consistently through to the middle Best results, use one shelf only	Fan element Fast and highly efficient even cooking	The heat produced by the circular and bottom elements is evenly distributed by the fan
PERFECT FOR Pastries and cakes	PERFECT FOR Pasta or potato dishes	PERFECT FOR Baking	PERFECT FOR Juicy roasts, no pre-heat required	PERFECT FOR Perfectly cooked quiches and tarts with no blind baking

FAN HEAT WITH TOP + BASE HEAT	FAN HEAT + GRILL	TURBO CONVENTIONAL HEAT	FULL GRILL	ECO GRILL
Combining conventional heat with fan heat for intense even cooking	Fan element and full grill Heat from both rear and upper elements	Fan assisted top and bottom elements Fast and even heat distribution without transferring smells or tastes	Full width grill Even and consistent grilling	Half width grill Energy saving inner grill section only
PERFECT FOR Crusty bread and perfectly cooked pies	PERFECT FOR Finishing off a cooked dish, or melting cheese without the worry of overcooking	PERFECT FOR Light and delicate baking, such as pastry or bread	PERFECT FOR Large pieces of steak or fish	PERFECT FOR Small portions of food, such as bacon or toast

Please note, function icons may vary slightly from Classic, Sense and Sense Premium.

TURBO GRILL	TURBO ECO GRILL	TURBO BASE HEAT	FRESH PIZZA
Fan assisted full grill Even and quick browning	Fan assisted half grill Even & quick browning for smaller dishes	Fan assisted bottom element Designed for delicate and slow cooking	Utilises a 345°C setting which cooks fresh pizza in 2 minutes 45 seconds
PERFECT FOR Cooking meat whilst keeping all the juices	PERFECT FOR Potato gratin or lasagne	PERFECT FOR Slow cooked lamb, or eliminating the need for blind baking	PERFECT FOR Homemade Italian-style Pizza

ROAST	DEHYDRATE	SLOW COOK	PROVING
Fan heat The Roast function automatically raises the oven to 250°C to sear the meat then drops to your chosen temperature	Fan heat This function uses fan heat, with a pre-set temperature of 60°C with options to select 50°C and 70°C	Top & bottom element Slow cooking over a long period of time at 90°C using conventional heat	Bottom element This function uses base heat at a temperature of 30°C
PERFECT FOR Sealing in all the flavours & perfect crackling on your pork joint	PERFECT FOR Drying fruit	PERFECT FOR Casseroles and stew	PERFECT FOR Proving dough

Please note, function icons may vary slightly from Classic, Sense and Sense Premium.

SABBATH PYROLYTIC SELF-CLEANING WARM WARM+

Top and bottom elements
Uses conventional heat with a selectable time of up to 72 hours, and a selectable temperature of 70°C to 140°C

PERFECT FOR
Observing the Sabbath day

Works by heating the oven to 475°C, causing even hidden & baked-on grime to carbonise into a fine ash for easy cleaning

PERFECT FOR
Taking the effort out of cleaning

Bottom element
A pre-set temperature of 40°C, with options to select 30°C and 50°C

PERFECT FOR
Warming plates and serving dishes

Bottom element
A pre-set temperature of 75°C, with option to select 100°C

PERFECT FOR
Keeping food warm

MICROWAVE MICROWAVE + FAN HEAT MICROWAVE + TURBO GRILL MICROWAVE + STEAM

Standard microwave cooking function

PERFECT FOR
Ideal for reheating leftovers

Fan heat and microwave
Reduce cooking times with the addition of fan heat for even cooking

PERFECT FOR
Fluffy jacket potatoes with a crispy skin in a quarter of the time

Microwave, fan and grill
Quick browning, ideal for cooking meat & keeping all the juices

PERFECT FOR
Cooking a whole chicken

Microwave and steam
Operate alternatively to cook your food quickly and healthily

PERFECT FOR
Steam puddings

MICROWAVE + CONVENTIONAL HEAT STEAM STEAM+ GRILL + STEAM TURBO GRILL + STEAM

Uses microwave with top and bottom elements

PERFECT FOR
Speeding up baking times for bread and cakes

Steam Injection
No transfer of flavours
Retains moisture and locks in nutrients
One of the healthiest cooking methods

PERFECT FOR
Cooking multiple food types on one tray

Steam Injection
To be used with certain functions to add an injection of moisture into the cooking process

PERFECT FOR
Achieving restaurant quality results

Top element and grill with steam injection
Both the top element and grill operate together to grill larger quantities of food
Combined with steam to help preserve moisture and flavours in food

PERFECT FOR
Succulent chops & steaks

Fan assisted grill with steam injection
The fan aids the distribution of heat from the grill evenly and with added steam ensures your food retains all its moisture

PERFECT FOR
Evenly cooked sausages or burgers

FAN HEAT + STEAM DEFROST / TURBO DEFROST AUTO SETTINGS BOOST DESCAL

Fan element and steam injection
Even heat distribution with the added benefit of the steam injecting moisture into the cavity

PERFECT FOR
Retaining the moisture in meat

Fan
This function is used to defrost food

PERFECT FOR
Frozen desserts

A range of automatic settings for milk, soup, vegetables, noodles, bread, fish, meat and chicken

PERFECT FOR
Making soup from scratch

Rapidly heat your oven to the required temperature using all elements at full power. Ideal for when you're in a rush

PERFECT FOR
When cooking time is less than 20 minutes

Pour in the descaler into the water tank, select this function and let the machine do the rest. This is recommended every three months

PERFECT FOR
Prolonging the life of your steam oven

Please note, function icons may vary slightly from Classic, Sense and Sense Premium.

Ovens

There's a Caple oven for every kind of kitchen and every type of lifestyle. Choose from our smart-tech Sense Premium range, sleek and elegant SENSE range or our exceptionally versatile Classic family.

Sense Premium.

Introducing the new range of Sense Premium cooking.

Smart technology, WiFi connectivity, 23 functions and intuitive features all controlled from your phone. Sense Premium ovens will revolutionise the way you cook forever. Designed with you in mind.

Complete the look with a coffee machine and wine cabinet designed to match the Sense Premium aesthetic to achieve show stopping results.

The new CapleHome is available to download on Android and iOS.

sp Look out for products marked with Sense Premium flags to easily identify the range.

#WhenPremiumMakesSense

Features + Functions

CAPLE RECIPES + FAVOURITES

Use the CapleHome App to access the latest recipes, save your multi-stage cooking settings and add your family favourites.

MULTI-STAGE COOKING

Some dishes require multiple functions at different stages of cooking. Multi-stage cooking does this for you without the fuss.

WiFi CONNECTIVITY

The new Sense Premium cooking range features WiFi connectivity.

CAPLE HOME

Download the new Caple Home app available on Android or iOS now.

CAPLETOUCH+

Saving your family favourites, couldn't be easier with the intuitive interface.

PIZZA

Create the perfect pizza in 2 minutes 45 seconds. Choose from thin & crispy or deep pan & the oven will then do the rest for you!

MEAT PROBE

Insert the probe into the meat. The meat probe icon will automatically display on the screen to set the core temperature. Once core temperature is reached the oven will turn off to ensure the meat is cooked perfectly.

DEHYDRATE

This function uses fan heat, with a pre-set temperature of 60°C with options to select 50°C and 70°C.

STEAM

The steam function temperature ranges from 40-100°C and automatically sets duration to 20 minutes. However cooking time can range from 1min to 9hrs 59 minutes.

MICROWAVE + TURBO GRILL

Uses microwave, fan and grill for quick browning. Great for cooking a whole chicken.

MICROWAVE + STEAM

Starting with the steam function the temperature increases to 100°C. The microwave and steam functions then alternate for speedy results and maximum flavour.

WARM+

Uses base heat, with a pre-set temperature of 75°C or 100°C to keep your food warm, just in case someone is running late!

PROVE

Create the perfect dough using the prove function which uses base heat at a temperature of 30°C.

FAVOURITES
Save your family favourites, multi-stage cooking settings, it couldn't be easier with the intuitive interface.

FUNCTIONS

SENSE

Choose from sultry black glass with an elegant stainless steel trim, subtle contemporary gunmetal, or a modern take on traditional steel. SENSE appliances have been designed to fit together effortlessly and will turn heads in any kitchen. Featuring smart thinking and intelligent solutions SENSE appliances deliver the ultimate in easy functionality.

Featuring innovative touch control technology, every SENSE oven delivers outstanding results, whatever the cooking task.

S Look out for products marked with Sense flags to easily identify the range.

MotionHeat+

MotionHeat+ technology utilises specially designed vents and fan heat to evenly distribute hot air around the oven cavity. It reaches the desired temperature rapidly with no need to preheat, saving time & energy. Perfect for multi-level cooking without the transfer of flavours, achieving even results every time.

TELESCOPIC RUNNERS

All SENSE ovens come with two full extension telescopic runners making it easier to check food as it cooks and reducing the risk of burning yourself on the oven interior.

ROTISSERIE

If you like perfect joints, opt for a SENSE oven that features a rotisserie rack, great for cooking succulent roasts.

PYROLYTIC OVENS

Pyrolytic technology works by heating the oven to 475°C, causing even hidden & baked-on grime to carbonise into a fine ash. It saves you vast amounts of elbow grease, and can in-fact improve oven efficiency over time.

PRECISION CONTROL AT YOUR FINGERTIPS

Our SENSE range features fully-programmable touch controls for precise and accurate cooking temperatures and times. Although, if you prefer the tactile feel of fixed dials, opt for the C2362 with solid metal controls.

SOFT CLOSE

Opt for a model with a clever soft close door which activates when the door is inches away from the closed position. The hinge gently moves the door into place, preventing it from coming to an abrupt close.

FUNCTIONS

FUNCTIONS

CLASSIC.

Our high-performance Classic range comes with a host of standard and optional features, designed to make cooking even more satisfying.

These ovens are classically designed, as the name suggests, in stainless steel and sheer black glass. You'll find touch control programmable electronic timers, cool-touch doors plus a pyrolytic self-cleaning model.

C Look out for products marked with Classic flags to easily identify the range.

LARGE VIEWING WINDOW WITH A LARGE CAPACITY TO MATCH

For more efficient cooking you can keep an eye on exactly what you're cooking without having to open the door and lose heat. Some single ovens also have a capacity as large as 67 litres, perfect for a hungriest of households.

MotionHeat+

MotionHeat+ technology utilises specially designed vents and fan heat to evenly distribute hot air around the oven cavity. It reaches the desired temperature rapidly with no need to preheat, saving time & energy. Perfect for multi-level cooking without the transfer of flavours achieving even results every time.

PERFECT HARMONY

The Classic range has been designed to seamlessly fit together to create a premium look. Whether you prefer a clean linear design or a practical stacked style, each model works perfectly together [see p.58-59].

TOUCH CONTROL PROGRAMMABLE ELECTRONIC TIMERS AND SOLID METAL DIALS

You can preset cooking start and stop times with ease of use and precise control at your fingertips.

FUNCTIONS

Microwaves & Steam Ovens

Can't choose between the two? Why not opt for a combination microwave and steam oven.

A must-have for a busy lifestyle.

Sense Premium.

COMBINATION MICROWAVES

AND STEAM

Versatility is key with our new innovative combination steam microwave.

This revolutionary, built-in appliance enables you to steam, grill, bake and microwave your food simply. It combines all the health benefits of steam cooking with the power and speed of a microwave.

Features + Functions

CAPLETOUCH+

The new Sense Premium cooking range features CapleTouch+ display. Saving your family favourites, setting multi-stage cooking timers, it couldn't be easier with the intuitive interface.

STEAM +

Set the oven to inject steam at specified intervals into the oven cavity during cooking to achieve restaurant quality results in your home.

WIFI CONNECTIVITY

The new Sense Premium cooking range features WiFi connectivity.

CAPLE HOME

Download the new Caple Home app available on Android or iOS now.

MULTI-STAGE COOKING

Some dishes require multiple functions at different stages of cooking. Multi-stage cooking does this for you without the fuss then allows you to save the setting to your favourites to ensure perfect results every time.

FAVOURITES

Save your family favourites, multi-stage cooking settings, it couldn't be easier with the intuitive interface.

FUNCTIONS

Meals in Minutes.

Minimalist design to complement any kitchen, yet big on handy features.

Depending on your cooking requirements, you can choose a microwave for its traditional uses such as warming up leftovers or defrosting food quickly. Alternatively, why not opt for a combination microwave? As well as cooking meals quickly, you can also use it as a normal oven and grill providing extra space when you are entertaining.

SENSE MICROWAVES

If you are in need of a traditional microwave to heat up your leftovers, the CM108 is the perfect choice. Or, if you're feeling more adventurous in the kitchen, try the CM111 combination microwave with a range of cooking options to enjoy.

TURNTABLE FREE DESIGN

Caple microwaves have been designed to look the part. Some models have 40L capacity, removable dishwasher-friendly glass base and a turntable free design. This means you can fit large dishes into the cavity.

CLASSIC MICROWAVES

Want to create a seamless built-in look? The Classic range allows you to neatly arrange the bank of appliances in a linear or stacked formation so you can match your oven and microwave perfectly.

S Look out for products marked with a Sense or **C** Classic flag to easily identify the ranges.

Combination Steam Cooking.

Steam cooking is especially well suited to cooking foods like seafood, bread, vegetables, pasta and rice - the sky's the limit.

Utilising the combined functions of a steam oven - fan, steam, and grill - you can be sure to beautifully capture flavour at every turn. From delicate fish and perfectly baked bread to cooking succulent joints of meat with fan and steam to lock in moisture, combination cooking has never been so easy.

TOUCH CONTROLS + LCD DISPLAY

The intuitive full touch control panel lets you swiftly access all functions, as well as the programmable electronic timer and electronic clock. You can also view the current cooking time and the actual temperature in the cavity.

DELICIOUS DESSERTS

Combining fan heat [dry heat] with steam [moisture] is the optimum environment for making perfect light pastry or cakes.

ODOURLESS COOKING

There are no food odours with steam. This means you can prepare different parts of a meal together, without the flavours mingling. You can save energy too by cooking your meat and vegetables together.

LARGE VIEWING WINDOW

From the display panel select the light function to check what is cooking without steam escaping the cavity.

Features

EASY CLEAN STAINLESS STEEL INTERIOR

The beautiful stainless steel interior means the cavity can simply be wiped clean after every use.

EASILY ACCESSIBLE WATER TANK

The water tank is conveniently located within the control panel and automatically opens at the touch of a button.

FUNCTIONS

Coffee Machines

Combining the subtle art of the barista with the very
latest in coffee machine technology.
Caple gives you perfect coffee at the touch of a button.

THE SECRET TO GREAT COFFEE

Fantastic coffee depends on many factors. The beans you use, the way they're ground, even what temperature it is and how it is frothed. Plus, of course, finding a coffee machine that's really up to the job.

BARISTA STYLE COFFEE

If you like milk with your coffee, you'll also need to polish up your frothing skills. The texture depends on how the air enters the milk as you steam. You need a smooth, consistent texture where the foam and milk intertwine. Look out for blobs of froth on top, and don't boil it. If the jug's base is too hot to touch, it means the milk's probably reached the right temperature.

For barista style lattes, cappuccinos and flat whites at the touch of a button.

MAKING A PERFECT ESPRESSO

What you're aiming for is a pour that starts out darkly coloured then turns into shades of caramel moving slowly, like honey. Caple coffee machines makes it effortless every time.

CHOOSING THE RIGHT COFFEE

Coffee beans vary in their size, shape, colour and flavour depending on the region and conditions in which they were grown. The range of unique flavours and aromas between regions is as expansive as the variety of wine available from different vineyards. It is worth experimenting with different varieties to discover a bean perfect for your palate.

Team that with one of our outstanding coffee machines and you'll have the perfect coffee every time.

Features

CAPPUCCINO, JUST THE WAY YOU LIKE IT

Using the milk dispenser you can make your perfect flat white, latte or cappuccino. For ease of use the coffee machine is set to deliver a standard cappuccino, although if you prefer more or less coffee you can adjust either to suit your preference.

COFFEE FOR TWO

Save time by making two cups of coffee simultaneously.

SEAMLESS INTEGRATION

Our coffee machines have been designed to work with Sense or Sense Premium range, so you can create your perfect combination.

COMPLETE CONTROL

Produce your ideal beverage with ease by adjusting the settings to your preference. You can control everything from the size and strength to the fineness of your coffee grind. Perfection every time.

S **C** Look out for products marked with a Sense or Classic flag to easily identify the ranges.

Warming & Storage Drawers

There's nothing more disappointing than a hot meal served on a cool plate. Cuple's warming drawers keep tableware at just the right temperature for when the food is ready to be served.

Why not add a storage drawer too?
It's a convenient and stylish way to organise your coffee and wine accessories.

Features

QUALITY INTERIOR

Precision engineered sliding runners give a high-quality feel. All models feature either a protective anti-slip mat or stylish black base.

SEAMLESS INTEGRATION

Our warming drawers have been designed to work with Sense or Sense Premium range, so you can create your perfect combination.

Recommended Combinations

All our compact appliances are designed to work with a matching oven. So when thinking about your kitchen design it is important to find the right combination for your needs.

For a contemporary look, opt for a linear design with clean, well-defined edges to showcase your appliances. Choose from our Sense Premium, Sense or Classic range for a style to suit you.

SENSE PREMIUM

SENSE GUNMETAL

SENSE STEEL

SENSE BLACK

CLASSIC

We recommend that when installing a stack or quad of products, a pair of our installation brackets [OVEN/BRACKETS2] are purchased to support the upper product ensuring a seamless fit.

LINEAR

QUAD

Hobs

Whether you choose gas, electric or induction, Caple's advanced technology and unswerving eye for detail means real control and stylish good looks every time.

Choosing the Right Hob.

INDUCTION

Uses leading-edge technology by creating a magnetic field between the hob and pan. They're quick, easy to use and energy efficient, vastly becoming a popular choice for professional chefs. [Find out more on p.64].

GAS

Heat is instant and the control is intuitive. You can choose either stainless steel or glass finishes. [Find out more on p.72].

DirectHeat+

Developed with cutting-edge design and outstanding efficiency in mind, DirectHeat+ sends the heat directly towards the base of the pan via 45° inclined flame. More heat hits the base of the pan rather than escaping around the sides, therefore decreasing boiling time and bringing food to temperature more rapidly.

ELECTRIC

The smooth glass finish of a ceramic hob makes cleaning easier. They're sleek and look very contemporary, making them ideal for more modern kitchens. [Find out more on p.70].

MIX + MATCH MODULAR HOB

Any number of modules can be mixed together in any sequence. In fact, the options are almost endless. [Find out more on p.82].

sp Look out for products marked with a Sense Premium flag to easily identify the range.

Induction Hobs.

They're hygienic, more energy-efficient, safer and easy to use.

They work by creating a magnetic field between the hob and the pan. Heat is instant, and it's easy to control. Once you remove the pan, they cool down very quickly, which is handy if kids are about. They're more energy-efficient because they only heat the pan area itself, rather than all around it. In fact, they use around 25% less energy than some hobs.

MEMORY RECALL

After switching the hob off, it is possible to recall the last used settings with a couple of simple button presses.

AUTOMATIC PAN DETECTION

This feature detects when a suitable pan has been placed on a cooking zone, helping to eliminate the possibility of the hob being activated by a non-suitable object.

BOOSTER + BOOSTER+

Saves time by increasing power for a quicker boiling time. Booster+ provides even further power and performance.

PAUSE FUNCTION

This allows you to temporarily stop the entire hobs cooking activity and then restart it at the same settings.

BRIDGE FUNCTION

Want complete flexibility when cooking? Why not try an induction hob that can bridge two zones. If you cook regularly using oversized pans such as fish kettles, these hobs will handle them with ease.

ANTI-OVERFLOW, BOIL CONTROL + ANTI-OVERHEAT

Some models include intuitive features to make cooking that little bit easier. Anti-overflow automatically cuts-off the cooking zone if liquid boils over onto the control panel. Luckily boil control maintains a temperature of 94°C, just below boiling, whilst anti-overheat prevents the hob from overheating and damaging the elements, preserving the lifetime of your appliance.

The TFT touch screen allows you to easily select cooking options through a seamless full colour display.

PAN MOVE

Pan move allows you to move the pan from one area to another taking all settings to the new location.

BOOSTER

Saves time by increasing power for a quicker boiling time. Available across all zones.

AUTO BRIDGE FUNCTION

Auto bridge function to link zones for larger pans.

MULTI-ZONE INDUCTION HOB

Features

BOOSTER AND BOOSTER+

Saves time by increasing power for a quicker boiling time. Booster+ provides even further powers and performance.

INDUCTION HOB

Features

PAN MOVE FUNCTION

Allows you to move the pan from one zone to another and it will automatically pick up the selected settings from the zone the pan has been moved from [power level and timer].

CHEF MODE

The chef mode creates three large zones, allowing you to cook with multiple pans at various temperatures all at the same time. For example, you can fry with intense heat then slide the pan over to a low temperature zone to keep it warm whilst you concentrate on other dishes.

- 2 Dia. 180mm - 1.5kW
- 2 Dia. 180mm - 2kW

INSTALLATION

- Diagram [p.222]
- Rated load 3kW
- Fuse rating 13A

PLEASE NOTE: The C841i induction hob achieves a 13A connection by restricting the maximum load to 3kW, this is done by cleverly limiting the combined zones to a maximum power level sum of 12. For example if you had boiling water on power level 6 on one zone you could cook rice on power level 4 and gently warm food on level 2 on a third zone.

INDUCTION FEATURES EXPLAINED, SEE PAGE 64

The Power of Electric Hobs.

Caple's electric hobs are engineered with performance, versatility and ease of use in mind.

Each hob has four separate zones offering different sizes, with individual lights that glow when activated. Touch control models set seamlessly into the worktop, but if you prefer more traditional operation opt for one of the dial control models.

The smooth black glass makes cleaning easy and thanks to minimalist styling our frameless ceramic models will fit into any type of kitchen.

Gas-on-Glass Hobs.

If you're looking for a hob that combines contemporary design with power and functionality, this one ticks all the boxes.

That elegant glass surface doesn't just look stunning, it makes your hob simple to clean, while linked cast iron pan supports let you easily transfer pans across burners or away from the heat. All burners are Flame Safe, so if a flame is extinguished for any reason, the gas supply is cut straight away. Some hobs also feature a responsive triple ring burner for extra powerful cooking.

DirectHeat+

Developed with cutting-edge design and outstanding efficiency in mind, DirectHeat+ sends the heat directly towards the base of the pan via 45° inclined flame. More heat hits the base of the pan rather than escaping around the sides, therefore decreasing boiling time and bringing food to temperature more rapidly.

TOUCH PRECISION CONTROLS

Touch controls set into black tempered glass look fabulous, but beauty is more than skin deep. Advanced digital technology gives you nine precise power levels on each burner, so they also offer an exceptional level of control.

GUNMETAL HOB

At Caple, we know how important it is to co-ordinate colours in the kitchen, which is why the gunmetal trend continues with our gas hobs. The sleek black glass and cool gunmetal control work together in perfect harmony.

GUNMETAL COLLECTION

Our gunmetal range includes both appliances, sinks & taps so you can create a cohesive and contemporary aesthetic in your kitchen.

Low Profile Gas Hobs.

Those who've cooked on gas rarely go back to any other hob. Gas rings provide immediate heat, and are intuitive, reliable, and super-easy to control.

Our gas hobs come in sleek stainless steel or smooth finishes, and look fantastic in contemporary or classic kitchens.

Unrivalled performance and looks, coupled with ease of fitting. Caple low profile hobs are designed to sit on top of the work surface with the smallest of edges.

They give you the appearance of a professional kitchen with added Caple refinement.

Modular Hobs.

Now you can build the perfect hob for your needs. Combine gas, electric, induction and modular extraction for a truly bespoke solution that's sure to impress.

Combine two, three, four or more modules, of any type and in any sequence. Introduce induction cooking into your kitchen by combining it with gas or electric, or wow with tepan - perfect for flash frying.

When coupled with powerful downdraft extraction it offers a clean, fully integrated design throughout – bespoke and beautiful.

Induction Downdraft Extractors.

SEAMLESS INTEGRATION + UNMISTAKABLE STYLING.

As the name suggests induction downdrafts combine intuitive induction hobs with the added benefit of integrated, powerful downdraft extraction.

SPACE SAVING INSTALLATION

Unique space-saving installation can be used with minimal ducting and the motor located behind the plinth which means you can still utilise the cabinets directly underneath the hob. For installation see p.225-226 .

The DD940BK gives you the option to use Plasma technology allowing you to recirculate the air with very efficient odour removal process.

The powerful, ultra quiet motor draws the cooking vapour through the 12 stage filter, removing grease and moisture.

Discreetly positioned behind the plinth, the motor draws the air through the ducting, on towards the filters.

The first filter creates the 4th stage of matter, Plasma. A trusted technology developed by the German university of Göttingen. The Plasma removes 95% of the odours passing through it.

A carbon filter removes any remaining odours and has a life span of 5 years or more when used with a plasma filter.

Clean air is then recirculated back into the room.

Extraction

A well-engineered extractor hood does more than just help to capture odours from your kitchen. Be bold, and use it as a visual focal point too.

Choosing the Perfect Hood.

We've designed one for every kind of kitchen. Striking colours, exceptional finishes, and plenty of functionality.

Extractors and hoods are designed to remove cooking odours, moisture and grease from the cooking environment. The extractor continually removes and filters the air when on. It then, either, returns the filtered air back in to the room or expels it through an external vent. The greater the extraction rate the more effectively this is done.

GETTING THE BEST FROM YOUR HOOD.

Try switching on the extractor or hood 15 minutes before you begin cooking. This creates kinetic air circulation within the kitchen carrying the air out more effectively. It is also advisable to keep it running for a further 15 minutes after you have finished cooking.

You can sit down and enjoy the results of your culinary skills whilst your Caple extractor or hood gets on with its job.

Once you have chosen your extractor, it is important to pair it with the correct venting. It is essential the stated ducting diameter is used, we also recommend rigid ducting to ensure you get the maximum performance. Not only will this prolong the life of your extractor, it will also improve efficiency.

If you choose to vent your extractor to the outside world, look out for the venting symbol shown to assist you in choosing the correct product. Please see p.136-137 for more information.

INDUCTION DOWNDRAFTS

This award-winning category of extraction is ideal for open plan living. The powerful extraction eradicates cooking odours from the room and the minimal aesthetics discreetly blends into the worktop for a seamless look. See our range of Induction downdraft hobs in the hob section, p.84-87.

DOWNDRAFT EXTRACTORS

This type of counter extractor is installed behind or alongside your hob. When you need it, just press the button and it glides up in to position.

WALL CHIMNEY HOODS

Available in all kinds of sizes, styles and finishes. Great for a dramatic focal point.

BUILT-UNDER HOODS

Ideal for smaller kitchens. They're cleverly integrated into the underside of kitchen units.

CEILING HOODS

They're unobtrusive and they save you space too. You can choose different motors and have complete control over extraction rates.

ISLAND HOODS

Better suited to larger kitchens. You can suspend them over a central island unit to make a stunning focal point.

INTEGRATED HOODS

Discretely hidden behind kitchen furniture, and pulled out when needed.

CONVENTIONAL HOODS

This type fits neatly beneath a kitchen unit, with controls usually found on the front.

Downdraft Extractors.

Caple downdraft extractors are the epitome of intelligent thinking in kitchen design. With an ingenious under-counter installation, wall space is kept clear and when integrated into an island unit, views across the kitchen remain uncluttered.

A downdraft extractor can be housed either behind or alongside a hob, in an island unit or within a base against a wall.

FLUSH FITTING

Fitting elegantly into the surface until activated, it rises out of the worktop beyond the height of the pans to extract odours directly from the cooking area.

These smart extractors deliver high extraction rates and give you a choice of motors and motor positioning options to suit your kitchen design. For example, your motor could be situated under the floor, on an external wall or in a cupboard, so noise can be virtually eliminated [p.104-105]. With real versatility, our downdraft extractors can expel air via ducting or recirculate it using charcoal filters.

SLEEK STYLING

Most of our downdrafts feature touch control technology and are designed to complement the appliances.

MOTOR CHOICES

Downdraft extractors will need to be purchased with a motor. For the full range please see p.104-105.

INVISIBLE MOTOR

The DDMEXT28 is designed to be easily and discreetly installed behind the plinth without the requirement of ducting to the outside of the building. For more details see p.105.

Ceiling Hoods

Style is nothing without functionality. Naturally, Caple's ceiling extractors come with both, as standard.

They're available in various sizes and engineered to achieve the very highest extraction rates. There's also a choice of motors, which can be positioned in a range of locations to reduce noise and free-up space.

Ceiling Hoods.

Every Caple ceiling extractor uses our perimetric extraction system, which draws air in through narrow apertures around the full perimeter of the pan. It means higher air pressure, greater efficiency and less noise.

CREATING THE RIGHT ATMOSPHERE

You can also select just the right kind of lighting you want for your kitchen - from bright white to a soft, cosy, glow.

CONTROL AT YOUR FINGERTIPS

Our user-friendly remote control places power and lighting functions within easy reach. It also allows you to set the handy timer function, which automatically switches off the extractor after 10 minutes. When you leave your kitchen you know that any odours will be gone by the time you return.

CENTRE STAGE

We love the challenge of making functionality look stunning. Our hoods represent the epitome of contemporary design and technology. Perfectly complementing any other Caple product, our ceiling hoods provide performance and styling like no other. LED strip lighting, white glass finish and intelligent features ensure it has a place not only as a talking point in your kitchen, but an invaluable and practical addition.

CHOICES

Some models have unique built-in motors, others will need to be purchased with a motor. To get the right power for you see our full range of motors on p.104 - 105.

Venting choices

Ensure you purchase the correct venting for your Caple extractor. For the full range please see p.136 - 137.

Wall Chimney Hoods

Our practical and stylish chimney hoods are sure to make a statement. Multi-functional and great to look at extraction will be a joy when you cook.

TAURI

The clean lines and striking aesthetics of Tauri sets this hood apart from the rest. Featuring a sleek, glass fronted touch control panel and exposed Stainless steel filters, it's sure to make a design statement in any kitchen.

ZELLA

The unique black or gunmetal aluminium wings frame a beautifully smooth sheet of sleek black glass. The minimal styling and touch control are perfect for creating an ultra-modern look.

Venting choices

Ensure you purchase the correct venting for your Caple extractor. For the full range please see p.136 - 137.

Venting.

To ensure you get the most out of your extraction we have the perfect venting solution to suit your needs.

CHOOSING THE RIGHT VENTING

To ensure you have the correct venting for your chosen hood, please refer to the hood specification where the required diameter kit is listed.

EXTERNAL MOTORS

Due to the power and fitment of Caple external motors [DDMEXT11, DDMEXT21, DDMEXT25, DDMEXT28, DDMEXT30 and DDMEXT40, see p.104-105] you must use rigid ducting.

COOLING VENTING

When installing integrated refrigeration it is important to use the correct venting.

High Efficiency Venting.

Due to the profile of a duct bend, air travelling through it can become turbulent causing increased resistance and noise. As a consequence the cooker hood will need to work harder in order to meet the required airflow rates, therefore consuming more energy. This high efficiency 90° bend has been designed to allow a uniform flow of air through the section of ducting, reducing the resistance by up to 60% and lowering the air

speed. All of which results in a quieter and more efficient system.

- Smoothly channels air through the duct bend in a uniform flow
- Reduced duct resistance by up to 60% to lower the systems pressure drop and overall energy usage
- Reduced air speed through the bend to reduce noise
- Performance has been tested by the Building Research Establishment [BRE]

The diagram illustrates the improvement of air flow when using C550GL or C950GL ducting:

Typical airflow through a standard bend

Typical airflow through a high efficiency 90° horizontal bend

COOLING

FREESTANDING REFRIGERATION	148
INTEGRATED REFRIGERATION	154
WINE CABINETS	166

Refrigeration

Chill it, freeze it, love it.

Whether you want a discreet space-saving
under-counter fridge or something more spacious,
you'll find it right here.

Whatever you want, that's cool.

We've one for every kind of kitchen, big or small. Different colours, different finishes, different sizes and plenty of functionality.

FRENCH DOOR

This large, freestanding fridge freezer has two doors on the top for the fridge and drawers underneath for the freezer, great for storing large items.

SIDE-BY-SIDE

Big on looks and big on capacity. Available in black or Stainless steel some side-by-side fridge freezers can also be plumbed in for a constant supply of cold filtered water and ice.

70/30 FREESTANDING

This is the perfect option when space is key. This stacked refrigeration solution allows you to keep that extra floor space with the impressive styling of freestanding refrigeration.

INTEGRATED

Our fridge freezer combinations or compact under-counter and in-column products can be hidden behind furniture doors. Choose fridges and freezers in different sizes and combinations depending on the space available and where you want to put them in your kitchen.

Freestanding Refrigeration.

Convenience, additional storage and ease of use are the benefits of a French door fridge freezer compared to other types of refrigeration.

STEEL TRIMMED INTERIOR

When it comes to quality, it's the small details that can make a big difference. The coordinated steel trim adds to the premium aesthetic of our American refrigeration.

DOUBLE UP

Two freezer drawers gives you easy access to your food and with the capacity of 211L, the CAFF42 can freeze all your tasty treats until you need them.

STYLISH VERSATILITY

The CAFF46GM features smart LED touch controls, cool gunmetal trim interior and four large capacity compartments, one of which can be used as a fridge or a freezer – the perfect combination of style and substance.

TELESCOPIC RUNNERS

The full extension telescopic runners make it easy to quickly pack away shopping, as well as allow for effortless and smooth access to the very back of your fridge-freezer drawers.

FULL ILLUMINATION

The stylish backlight takes centre stage illuminating the entire fridge from top to bottom ensuring you can see all your fridge's contents quickly and easily.

INTERNAL LED LIGHTING + TOUCH CONTROLS

Bold, well positioned LED lighting illuminate the interior of the fridge for excellent visibility while the touch controls provide quick access to all the handy functions.

Integrated Refrigeration.

FROST-FREE

No more laborious defrosting with a scraper. Our frost-free system works by heating up an element for a short time, which melts the ice and prevents build-up. Keeping a freezer ice-free means food stays fresher for longer. Freezing food is also much quicker, preserving as many nutrients as possible and freeing up much needed storage space.

MODERN LIVING

The RiL1796 fridge and RiF1796 freezer have been designed with modern living in mind. The matching, in-column fridge and freezer are hidden behind your cabinet doors for an ultra neat finish in a contemporary or classic kitchen.

ENHANCED LIGHTING

LED strip lighting across the top and down each side of the fridge for a stylish, practical finish.

FULLY ADJUSTABLE SHELF

Key features in RiL1796, Ri7306 & Ri5506 fridge include a fully adjustable shelf in the door for true flexibility in your cooling appliance.

GLASS SHELVES

Some of which have a deluxe steel trims to catch any spills.

Features

THE FRESHEST FOOD

Caple Fresh technology eliminates ethylene gas [a by-product of fresh foods] inside the vegetable drawer, therefore enabling your fresh food to last for longer. Caple's cool airflow system also ensures cold air will flow to every level for even chilling.

FROST-FREE

No more laborious defrosting with a scraper. Our frost-free system works by heating up an element for a short time, which melts the ice and prevents build-up. Keeping a freezer ice-free means food stays fresher for longer. Freezing food is also much quicker, preserving as many nutrients as possible and freeing up much needed storage space.

LED LIGHTING & ELECTRONIC CONTROLS

Strip LED lighting adds a modern feel, while electronic controls are precise and easy to use.

FRUIT & VEGETABLE PRESERVATION

The new Caple Fresh preservation technology inside the crisper drawer, ensures that your fruit and vegetables stay fresher and tastier for longer. This innovative new system helps to eliminate the natural gases that are produced during the ripening and ageing process, preserving them for longer.

Also, the Caple Fresh preserver does not need to be replaced. It can be regenerated by exposing it to sunlight for one day a year.

Wine Cabinets

Caple's wine cabinets create the optimum storage conditions for your wine; the correct temperature, humidity and air circulation. They even use low vibration technology to minimise disturbance.

And of course, they look great.

Care For Your Collection.

TO STORE

All wine should be stored at 12-14°C whether red or white. Our cabinets simulate cellar conditions - dark, still, humid and a constant temperature.

TO SERVE

For rosés and whites it's 8-14°C, for sparkling wines it's 6-10°C. Full reds need 16-18°C, whereas lighter ones are best at 13-16°C. For some wine cabinets this temperature variation is a problem. However, Caple cabinets can offer multiple zones that keep all your wines at the perfect temperature for storing or better still, serving.

COMPRESSOR COOLING

When choosing a wine cabinet it's important to consider the type of cooling system it uses. Many conventional cabinets use thermo electric technology, which is only capable of cooling to 15°C below the room's ambient temperature. So on a warm day of 25°C the contents will only cool to a minimum of 10°C, leaving your wine exposed to potentially damaging temperatures.

Caple's wine cabinets use a compressor cooling system, which maintains precisely the right temperature, regardless of the ambient room temperature.

THE IMPORTANCE OF LIGHTING AND STACKING

Ultraviolet light causes lightstrike, which makes wine age prematurely. So it's important to avoid exposing bottles to sunlight or fluorescent light. Our white LEDs not only look great, they are also UV-free with no heat output either.

Bottles should usually be stored on their side so the wine stays in contact with the cork. This keeps the cork moist and ensures a good air seal for the bottle, which prevents oxidation and immediate ageing.

Wine benefits best from side storage if the level of the wine reaches at least the upper shoulder of the bottle when upright. Caple's wine cabinets provide sufficient shelves to allow for bottles to be stored either on a single level for easy reach, or stacked for longer storage.

FINER WINE

Vibration and humidity during storage will influence how your wine will taste when it's finally poured. That's why Caple's wine cabinets come with anti-vibration gaskets and low vibration compressors to prevent disturbance to the wine's sediment balance. Our cabinets also create an ideal atmosphere of above 65% humidity, to preserve cork quality and prevent mould and odours. You can be confident your wine is in good hands.

Sense Premium Wine Cabinets.

TELESCOPIC SHELVES

The beech and stainless steel fronted telescopic wire shelves are gentle on the bottles, reducing any accidental scratches on the label and allowing you to easily view your collection. Perfect for Burgundy, Bordeaux and Champagne bottles.

AIR PURIFYING TECHNOLOGY

Charcoal filters eliminate odours and impurities in the air, preventing them from penetrating the cork, to ensure your collection is at its best when it comes to serving.

PREMIUM FUNCTIONALITY

Four light settings and four functions means you can find the right storage environment to suit your wine.

FULLY INTEGRATED

The Wi6161 & WC1800 integrated wine cabinets are perfect for creating a seamless aesthetic. Simply make a frame for the cabinet to match your kitchen furniture to create a seamlessly discreet and truly unique, luxurious style.

sp Look out for products marked with Sense Premium flags to easily identify the range.

ON/OFF

Internal light is continuously on. Three minutes after closing the door the light will dim for a more subtle look.

DOOR OPENING LIGHT

Internal light will switch on when the door is opened, and off when the door is closed.

NORMAL MODE

The wine cabinet will operate with the temperatures you select.

INTELLIGENT MODE

The fan speed adjusts according to the ambient temperature so the cabinet doesn't have to work as hard and also saves energy.

BRIGHTNESS

Once a light function is selected you can adjust the brightness of the internal lighting.

ECO MODE

Lighting and control panel turns off and the compressor is delayed. Perfect for saving energy.

TIMER

This function keeps the lights on for 10 minutes once the door is closed and then switches off.

DEMO MODE

Primarily for Retail use. In this mode the compressor and heater are disabled and the fan input is reduced.

Make a frame for the cabinet to match your kitchen furniture to create a seamlessly discreet and truly unique, luxurious style.

Features

SEAMLESSLY INTEGRATED

Simply make a frame for the WC1800 to match your kitchen furniture, to create a seamlessly discreet and truly unique, luxurious style, with all the premium functionality you can expect with Caple wine cabinets.

TELESCOPIC SHELVES

The beech and stainless steel fronted telescopic wire shelves are gentle on the bottles, reducing any accidental scratches on the label and allowing you to easily view your collection. Perfect for Burgundy, Bordeaux and Champagne bottles.

CHARCOAL FILTERS

Charcoal filters eliminate odours and impurities in the air, preventing them from penetrating the cork, to ensure your collection is at its best when it comes to serving.

PREMIUM FUNCTIONALITY

Four light settings and four functions including Eco means you can find the right storage environment to suit your wine.

PREMIUM FUNCTIONALITY

Four light settings and four functions including Eco means you can find the right storage environment to suit your wine.

Filler Panels & Plinths.

If you have a reduced plinth height you can use a filler panel made from the same material as the wine cabinet [gunmetal, black or stainless steel], to create a seamless look with no gap.

A full plinth or recessed plinth grille option is available for our undercounter wine cabinets. They neatly cover the ventilation hole in the plinth and blend in with your kitchen décor.

Sense + Classic Wine Cabinets.

DUAL ZONE

Dual zone wine cabinets allow you to store your collection at the perfect temperature for storing and drinking.

GLASS SHELVES

The glass shelves allows you to convert some of your wine cabinet into storage for canned drinks.

CHAMPAGNE SHELVES

The easy-slide beech shelves are non-scratch so they won't damage bottle labels. If Champagne is your drink of choice, the slatted design allows you to store larger bottles so you're prepared for any special occasion.

FEATURES

- Shelves can accommodate 750ml Bordeaux and Burgundy bottles
- No-frost compressor cooling technology maintains a consistent temperature
- Single temperature zone for red, white or sparkling wine
- Touch control and white LED display
- UV/heat-free white LED lighting [switchable]
- Vibration free
- Stainless steel square handle
- Beech shelves
- Fan circulated cool air for even temperature distribution
- Reversible door
- High temperature and open door alarm

- 3 Sliding shelves and 1 base shelf
- 100% CFC/HFC free
- Toughened UV protected glass door
- Humidity control water tank
- Black cabinet interior and exterior

WC6411 UNIQUE FEATURES

- Black glass doors with gloss black door frame

WC6401 UNIQUE FEATURES

- One piece stainless steel door

CAPACITY

- 1.91 Cu ft/54 Litre total net capacity
 - 2.08 Cu ft/59 Litre total gross capacity
 - Stores max. 21 Bordeaux style wine bottles 750ml
- Bottle stacking diagrams available at caple.co.uk

OPTIONAL EXTRAS

- 6 Wine labels [WINELABEL]
- Black square handle [HANDLE9BK] for WC6411 only
- Visit caple.co.uk for full range

INSTALLATION

- Diagram [p.242]

Freestanding Wine Cabinets.

FLEXIBILITY

Freestanding wine cabinets offer great installation flexibility. You can either house them in units to give them the appearance of being built-in, or you can have them as a stand alone feature.

TRIPLE ZONE

The WF1552 & WF1553 triple zones are independently controlled allowing you to keep your collection at the perfect temperature for storing & drinking.

WINE GLASS RACK

The WF1552 & WF1553 also feature a wine glass rack. The glass rack allows you to convert some of your wine cabinet into storage for wine glasses or flutes, giving you the perfect chilled glass.

MAXIMUM STORAGE

With storage for 111 Bordeaux style bottles, the WF1552 & WF1553 boast the largest storage capacity in our extensive collection.

FEATURES

- Freestanding or built-in installation with correct ventilation
- Shelves can accommodate 750ml Bordeaux, Burgundy and Champagne bottles
- Charcoal filter [x3]
- No-frost compressor cooling technology maintains a consistent temperature
- Easy glide beech shelves
- Touch controls and white LED display
- UV/heat-free white LED lighting [switchable]
- Fan circulated cool air for even temperature distribution
- 3 Humidity control water tanks
- Vibration free
- Reversible door
- 2 heaters raise internal temperature when external temperature drops
- High temperature and open door alarm
- Upper zone has 1 wine glass rack and 2 sliding shelves
- Middle zone has 2 sliding shelves and 1 display shelf

- Lower zone has 3 sliding shelves and 1 base shelf
- 100% CFC/HFC free
- Toughened UV protected glass door
- Stainless steel handle
- Wine labels and holders included
- Door lock
- Air ventilation through plinth grille

CAPACITY

- 14.23 Cu ft/404 Litre total net capacity
 - 15.86 Cu ft/499 Litre total gross capacity
 - Stores max.111 Bordeaux style wine bottles 750ml [22 bottles in upper zone, 45 bottles in middle zone and 44 bottles in lower zone] If wine glass rack is replaced by WSHELF1, upper zone capacity increases to 44 bottles.
- Bottle stacking diagrams available at caple.co.uk

OPTIONAL EXTRAS

WASHING

DISHWASHERS	196
WASHING MACHINES	206
WASHER DRYER	210
TUMBLE DRYERS	212

Taking the Chore out of Washing.

Who says that functional objects can't look fantastic? That's why we've designed our dishwasher and laundry appliances with an eagle eye on performance and style.

Caple is renowned for ultra stylish looks, hi-tech and all-round ease of use. With fast, efficient clothes washing and drying and sparkling clean dishes, our appliances will always get the job done beautifully with minimal effort.

WASH HOWEVER YOU WISH

Our range of washing appliances gives you all the options you need to fit in with your kitchen and your budget. What's on your wish list? An appliance that makes the most of minimal space? One that can cope with a large family? Or super stylish looks? We tick all your boxes.

Our dishwashers are exceptionally versatile, using clever technology to deal with any type of load. Our washing machines and washer dryers make light work of all your laundry needs with features like allergy care, stain reduction and extra large doors. What's more, Caple tumble dryers can be kept neatly behind furniture doors for a flawless finish.

Dishwashers

Ask many people to name a household item they wouldn't want to live without, and many will answer "dishwasher".

Happily our reliable dishwashers will give you load after load of squeaky-clean pans and glassware that sparkles like new.

Performance with Shine.

Whether it's a quick wash or something more heavy-duty, every Caple dishwasher is designed to perform well. All models are fully integrated to tuck away behind your kitchen doors.

Features

FLEXIBLE CUTLERY TRAY

Why not opt for an adjustable cutlery tray. The tray sits at the top of the dishwasher freeing up more space in the lower basket. On the

600mm models you can choose from five set-up options, [shown below] depending on what is in the basket below.

WATER CONSUMPTION

The entire range has low water consumption figures, which is not only great for the environment but your pocket also. The Auto Wash programme on the Di482 uses an astonishingly low 9 litres of water.

ALTERNATIVE WASH

Available on a selection of models the alternative wash allows you to select either the upper or lower baskets for the load. You'll save water and energy with smaller loads.

SLIDING FURNITURE DOOR SYSTEM

The Di653's new sliding door mechanism, allows a full height or reduced height plinth to be fitted without cutting.

ADJUSTABLE UPPER BASKET

Look out for models with adjustable upper basket. You can change the height of the upper basket [even with full loads] with the simple release of two conveniently placed levers.

POWER WASH

Power Wash, exclusive to the Di653, when used with either intensive, normal, economy, glass and one hour express programmes, helps break through heavily soiled loads by increasing washing temperature and duration.

AUTO DOOR OPEN

The door automatically opens at the end of a cycle releasing steam to improve drying.

INTERNAL LED LIGHT

Activated when the door is opened, it illuminates the inside.

REDUCE YOUR WATER AND ENERGY USAGE

The Half Load function on our models is ideally suited to small loads, unlike traditional Half Load programmes [which usually only use one basket] reducing energy and water use.

DELAY TIMER

Allows you to delay the start time for between 1-24 hours.

AQUASTOP

Automatically cuts off the water at the first sign of a leak, helping to avoid costly water damage.

AUTO WASH

Auto wash on Di653 has sensors checking the level of cleanliness of the load, saving you time, energy and water.

ELECTRONIC CONTROLS

Simple controls mean you can change between options at the click of a button.

DOOR SAFETY LOCK

Our machine operates at high temperatures during mid-cycle. The door will remain locked until the clothes cool 53°C.

STAIN REDUCTION

Uses advanced technology to maximise cleaning action, keeping your whites looking fresher for longer.

Tumble Dryer.

VENTILATION

Ensure your tumble dryer is well vented and the plinth is notched correctly. For a discreet and seamless finish, use an integrated plinth grilles to cover the aperture.

It has all the functionality of a freestanding model but with the seamless integration of a built in tumble dryer. Caple are one of the few brands to have a tumble dryer with Heat Pump Technology that can also be built in.

We want your lives to be easier. Caple's intelligent tumble dryer makes sure you always have a pile of soft, freshly-laundered garments ready when you need them.

Features

HEAT PUMP DRYER

Conventional tumble dryers work by releasing the hot air used to dry to clothes, whereas heat pump technology conserves and reuses it. This is one of the many reasons heat pump technology has been used in Switzerland and Germany for about 13 years.

WHAT ARE THE BENEFITS?

Heat pump tumble dryers are much better for the environment and cheaper to run, with heat pump technology using almost 50% of the energy used by conventional models (C-rated). Moreover, since it uses an energy efficient heat exchange system, the air temperature inside the drum is considerably lower than conventional dryers, which provides a better protection for clothes.

HOW DOES IT WORK?

Heat pump tumble dryers have a condenser that separates water from the warm air that passes over the wet clothes and puts it in a water tank. The remaining dry warm air is then pumped back through the drum, re-using it to help the clothes dry faster. This makes them by far the most energy efficient of all the tumble dryer types available.

Plinth Heaters.

Choose from hydronic or electric models [which are plumbed into the central heating or stand-alone, respectively] and stainless steel or white grilles.

Look out for plinth heaters that can also blow out cool air on warm days [or when you can't stand the heat but have to stay in the kitchen!]. A neat way of warming your kitchen.

Food Waste Disposal.

A waste disposer hidden away under the sink can help you recycle your food scraps and leftovers like potato peelings, chicken bones, egg shells and tea bags. It's clean, it's green and it leaves less to clutter up your bin. It also reduces any decomposing food odours.

It couldn't be easier or more convenient to use. Simply turn on the cold tap and the disposer then empty everything into the sink. The disposer grinds the food waste into fine particles and flushes the waste away down the drain.

Since more than 25% of household refuse is food, that means much less rubbish to take away and clog up our landfill sites. It also means a reduction in the amount of greenhouse gases emitted.

Waste from your disposer can actually be recycled into a soil conditioner once it reaches the water treatment plant, so you will be making a positive contribution to your environment.

All models carry a lifetime corrosion proof guarantee, this warranty covers against failure due to corrosion.

PREMIUM FEATURES

The lightweight and compact design of the WDU125 features easy mount installation and 1.25hp motor and grinding system with a superior torque grind speed for a long system life and maximum power.

BIO SHIELD

The Bio Shield odour protection on the WDU125 is treated with antimicrobial agent to provide ultimate protection against the growth of bacteria and subsequent odours.

All models carry a lifetime corrosion proof guarantee, this warranty covers against failure due to corrosion.

 - Basket strainer waste decorative cover [CWC2]
- Visit caple.co.uk for full range

Features

WDU125 FEATURES

The lightweight and compact design of the WDU125 features easy mount installation and 1.25hp motor and grinding system with a superior torque grind speed for a long system life and maximum power.

BIO SHIELD

The Bio Shield odour protection on the WDU125 is treated with antimicrobial agent to provide ultimate protection against the growth of bacteria and subsequent odours.

INDUCTION HOBS

Induction hobs C950i & C901i:

A minimum gap of 20mm is required beneath the hob fans, and a 4mm gap must be left under the worktop at the front of the hob for ventilation.

Induction hobs C950i - All 4 zones must be installed.

ELECTRIC HOBS

GAS HOBS

GAS HOBS

MODULAR HOBS

If installed without a gap in between, cut-out width = [no. of hobs - 1] x 288mm + 268mm

INSTALLATION MADE EASY

Minimum cabinet depth depends on orientation, hob type and worktop material. Cabinet base may need to be cut or routed to accommodate height of unit. If positioned behind a hob, minimum cabinet width for DD522/606 extractors is 600mm, and for DD903/911/901 allow 900mm. If positioned alongside a hob, the cabinet may need to be reinforced to strengthen where the base has been modified.

The hood can be fitted right up to an electric hob [50mm gap required for gas hobs], but always ensure that the independent electronics box in the cupboard below is installed at least 650mm from the heat source.

The hood can be ducted from both sides enabling the downdraft to be positioned behind a hob and under-counter oven.

CAPLE CARE

Here at Caple, performance and reliability are the most important features considered when designing and manufacturing our products. With that in mind, we have developed Caple Care, an after-care solution comprising of three tiers to give you that extra peace of mind.

See page 246 for more extended guarantee information.

FREE 2 YEAR GUARANTEE

Across all Caple appliances we offer a free 2 year guarantee on parts and labour. When selecting the components to design your perfect kitchen it is important you have the right assurance without spending an extra penny. All you need to do is visit our website or call us on 0330 123 0998 to register your free 2 year guarantee.

5 YEAR EXTENDED COVER

Why not extend your cover to 5 years? Caple Care 5 years parts and labour cover means for a one off payment or a monthly fee you can protect your appliance for a total of 5 years [including your free 2 year guarantee] on all parts and labour for any of your Caple appliances. Please visit our website for further details or see page 246.

OUT OF GUARANTEE

If you choose not to opt for a 5 year extended warranty, don't worry. Here at Caple we offer out of guarantee cover. So, if you are not covered under our extended warranty, for a fixed fee, we can still arrange a service call [including parts and labour] or a replacement product up to 6 years after the purchase date. Terms and conditions apply.

TO REGISTER YOUR FREE 2 YEAR GUARANTEE OR DISCUSS AN EXTENDED WARRANTY, CALL

0330 123 0998 OR VISIT [CAPLE.CO.UK/REGISTER-YOUR-APPLIANCE](https://www.caple.co.uk/register-your-appliance)

Lines are open 9am - 5pm Monday to Friday [excluding bank holidays].
Calls may be recorded and monitored for quality and training purposes.
Full Terms and Conditions can be found at www.caple.co.uk.

Caple Care.

All Caple appliances come with a 2 year parts and labour guarantee. You can extend this to provide a full 5 years parts and labour warranty.

THE BENEFITS OF TAKING OUT AN EXTENDED WARRANTY

The Caple protection plan has been carefully put together so customers who take out the extended cover benefit from:

5

Up to 5 years parts and labour warranty against breakdown

A nationwide network of Caple approved engineers to undertake repairs in the home

£

Spread the cost over 10 months with our monthly payment plan visit www.worldpay.com for full T&Cs

A replacement appliance should the repair of the original be uneconomic or impossible

Access to the Caple UK based contact centre

To register your free 2 year guarantee or discuss an extended warranty, call

0330 123 0998

Calls are charged at the local rate– please check with your provider for actual charges.
